

December Kennedy Tank Talk

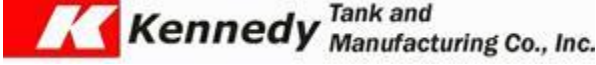

Team,

I hope everyone is doing well and ready for a great holiday weekend! Below are some updates from the Kennedy Tank team in December!

- Safety
 - We have a commitment towards safety that is unparalleled and in December we proved that commitment via field safety day and in-line shop training day.
- Field Safety Day
 - Every year, the Kennedy Tank Field Division shuts down all their field operations and brings the team to the home office for their annual, “Field Safety Day.” What makes this unique from other similar events is the fact that we incorporate a level of compliance, but offer additional topics requested from our field team. One special guest this year was Dennis Avery from Wheeler Mission. He spoke about addiction and how to manage people with addiction problems. We also highlight the day with Kennedy Tank’s confined space entry and rescue trainer.
- In-Line Shop Training
 - In our manufacturing shop, we continue to grow the safety culture there as well. We partnered with IPL/AES Energy to come in and give Live Wire Electrical Safety Training. Our approach to growing our safety culture is not only to educate on work related safety topics but also educate our team on skills that they can apply off the job.

- Kennedy Tank Giving Back
 - This year Kennedy Tank will be adopting two local families for Christmas giving money and donations of canned goods in order to further our support in the local community.
- Merry Christmas!
 - Kennedy Tank wishes everyone a Merry Christmas and hopes everyone gets to spend quality time with family and friends this holiday season!
