

Team,

Thank you for reading November's edition of Kennedy Tank Talk. Below you will find some updates from the month. The entire Kennedy Tank team hopes everyone has a great Thanksgiving!

- **Customer visits shop and helps our team install screens on (3) Molecular Sieve Columns.**
 - These are 9' OD X 50' tall made of .5" thick 516-70 carbon steel with a support skirt and vacuum rings shipping to an ethanol plant in Minnesota!

- **Kennedy Tank successfully passes another 3-year ASME review/audit.**
 - We have been building ASME pressure vessels since the 1930's and are now able to fabricate vessels north of 200,000 pounds and up to 3" thick. If you would like to see our updated quality control manual to learn more about our processes and commitment to quality, let me know!
- **November Kennedy Tank Anniversary's**
 - 6 Kennedy Tank teammates celebrated 24 years or more with Kennedy Tank in November. Big Congrats to Mike Pate (24), Matt Young (26), Angie Brackin (29), Billy Frye (32), Scot Evans (34) and John **"The King of Engineering"** Cochran (37)! Teammates like these six are the reason we have been in business for over 120 years!
