

## September Kennedy Tank Talk

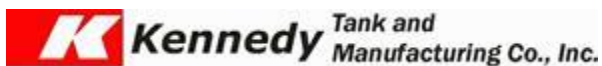

Team,

Thank you for reading the first monthly Kennedy Tank monthly tank talk!

Below you will find our updates for September.

- In the attached short video, **VP of Operations Bill Kennedy** discusses a recent project we just completed fabricating in the shop that comprised of (5) 40,000 gallon API 650 tanks. Take a look at the tanks and let me know what you think.
- Kennedy tank is partnering with STI to help sponsor a pressure vessel conference September 25<sup>th</sup> in Houston, TX. Andy Personett VP of Technical at New Castle Steel will be presenting on metals applications and Mike Heinrich VP of Operations at Boardman will be presenting on welding techniques.
  - Extremely late notice here, but if you plan on going to the conference, let us know and we can get you in at no cost!
  - Link to register: <https://www.eiseverywhere.com/ehome/index.php?eventid=257853&eb=441148>
- Fourth Quarter Push!
  - It is that time of year where we typically see rush jobs that need to be completed before the end of the year. Kennedy Tank is here to help you with those needs. We do have available capacity to handle any pressure vessel, shell and tube heat exchanger, and custom tanks you may need before year end. Let us know what we can do to help.

Be on the lookout for October's tank talk in the coming weeks!

Jimmy Kennedy
