

Team,

Welcome to February's edition of Kennedy Tank Talk. Below you will find our updates for the month.

- **API 650 Tank Anniversary!**
 - This month marks the 61st anniversary of Kennedy Tank fabricating API 650 tanks for the oil and gas industry. Ranging from 8-15' diameter shop-built tanks to 150' diameter field erected tanks. Kennedy Tank continues to be an industry leader when it comes fabricating quality API 650 tanks.

- **David Reinkemeyer gets promoted to field project manager!**
 - David Reinkemeyer brought 6 years' experience in the manufacturing and fabrication industry as both a welder and a shop foreman when he joined Kennedy six years ago. Dave has served in our Field Services Division as the Quality Control Manager and holds credentials as a Certified Welding Inspector and as an API-653 Inspector. After nearly 5 years as a Q/C Manager, Dave has been promoted to a Field Project Manager.
- **Come take a tour of our shop!**
 - We would love to give you a tour of our shop and show you what has made Kennedy Tank an industry leader for the past 120 years. Please call or email me at any point to schedule a tour.
- **Capacity available!**
 - We have additional capacity in our production schedule and would love to quote any ASME pressure vessel, tank, shell and tube heat exchanger projects in 2018!

*Please email me if you would no longer like to receive these emails
