

Team,

Thank you for reading March's version of Kennedy Tank Talk. Below you will find some updates for the month.

- **M-PACT Trade Show** ○ Kennedy Tank participated in the M- PACT trade show which is the largest gathering place in the Midwest for energy and convenience industry leaders. It was great to see many of our customers at the show and learn more about their future tank needs!
- **Welcome Steven Prout!** ○ Steven worked as a laborer for his father's residential remodeling company for 5 years while he was getting his degree in Mechanical Engineering from IUPUI. He received his degree in May 2017 and began working at Kennedy Tank in October 2017! Welcome Steven!

- **Engineering Expertise!** ○ The Kennedy Tank design team averages over 20 years of experience designing custom tanks, vessels, columns and heat exchangers. Our engineering group includes the Chemical, Civil/ Structural, and Mechanical Engineering disciplines. Due in large part to our expertise, we are able utilize our extensive technical experience to develop optimized, cost-effective solutions.

Let us know if there are any projects we could actively quote in 2018! Kennedy Tank is here to help!
