

July's Kennedy Tank Talk

Team,

Thank you for reading this month's version of Kennedy Tank Talk. Below are a couple updates from the Kennedy Tank team!

- **2018 inductee into the Indiana Manufacturers Hall of Fame!**
 - We were recently notified that we are getting inducted into the Indiana Manufacturers Hall of Fame! Huge kudos to all Kennedy Tank team members who have helped further manufacturing in the state of Indiana for over 120 years!
- **The shop added an 86" interactive flat panel that is linked to our ERP software through Microsoft BI.**
 - Eliminated the time spent rewriting the "Job Board" each week. Information is pulled directly from the work orders that are already in our system.
 - Created live up to the minute information that is readily available with one touch.
 - Allows group collaboration by viewing and making notes on prints during pre-job meetings.
 - Huge shout out to Dan Yoder who recently became our efficiency/production scheduler and spearheaded this effort!

- **Metabo Power Tools Safety Training**
 - Special thanks to the Metabo Safety team for leading all of our ASME welders through multiple trainings on best practices when using electric grinders. We recently upgraded from air to electric grinders which has already drastically improved our efficiency in the shop!
