

January's Edition of Kennedy Talk

Team,

Thank you for reading this month's version of Kennedy Tank Talk. Below you will read some updates from January.

- **2019 has become the year of heat transfer for Kennedy Tank!**
 - We have already had numerous jobs in the shop with dimple, conventional, internal coils, and half pipe jackets. We have made it an emphasis over the past five years to become more proficient in helping customers with their heat transfer needs and 2019 is off to a great start!

- **Kennedy Tank History!**
 - Did you know back in the early 90's Kennedy Tank fabricated antenna columns that were helicoptered on top of what was then the Antenna building in downtown Indianapolis. This is still the tallest building in Indianapolis and we are proud of the partnership with what is now Salesforce Tower.

- - **Shop Tours**
 - If you or your team is ever in the Indianapolis area and would like to see our facility, we would love to show you around and give you a feel for what it takes to build high quality tanks!
 - **Available Capacity**
 - With a couple recent projects getting delayed, we are looking for projects we can quote and deliver to you quickly! Let us know if you have any vessel, tank, or heat exchanger needs in the near term
