

## February's Edition of Kennedy Tank Talk

Team,

Thank you for reading this month's version of Kennedy Tank Talk. Read below for some updates from February.

- **2019 Safety Orientation Kickoff Meeting**
  - **Greg Anderson** (Safety Director) and **Mike Curry** (Production Manager) led numerous safety meetings with our entire production and office team last week to update everyone on important changes/best practices that have been implemented over the past year. This pro-active approach has led our Kennedy Tank shop to currently have the longest streak with no recordables in over 5 years! Great work team!

- **86" flat panel in WEK**
  - As you can see above, we added our second 86" touch screen monitor in our conference room this month. Both monitors are linked to our ERP software through Microsoft BI showing up to the minute information on every job in the shop plus much more!
- **Weld Quality + X-Ray**
  - Below you will see a typical weld Justin Ard laid on a recent heat exchanger. Next month Justin will celebrate his 4-year anniversary at Kennedy Tank! The Kennedy Tank team has only failed 1 X-ray this year and has a passing percentage of 98.25% in 2019! Great work team!

- **Available Capacity**

- We do have windows in our production schedule where we can fit fast track projects on tanks, exchangers, and ASME pressure vessels. Please give us a call if you have a project in which delivery + quality is crucial!

Tim Noyes (Sales Engineer), 317-780-3526, Tnoyes@kennedytank.com
