

**May's Edition of Kennedy Tank Talk**

- **Kennedy Tank Special Gets Ready for Top Speeds!**
  - There is no better time of year in Indianapolis than the month of May! Pat Kennedy will be driving the Kennedy Tank Special at the Speedway on Friday morning at speeds north of 140 miles per hour. Kennedy Tank sponsored numerous cars in the 500 and had a best finish of 8<sup>th</sup> place in 1936! Big Shout out to Jack Harvey who is starting in 25<sup>th</sup> position in this year's 500, Go Jack Go!

- **We ramped up our spend on four major capital improvements in May!**
  - The team made four purchases to increase our safety, quality, capacity and efficiency recently. A 55-ton Terex rough terrain yard crane and a 5-ton overhead crane will help us lift and move more material and stay safer. We also purchase a circle burner and nozzle welder from Circle Welding Innovations to help speed up production and increase quality on thick vessels.

- **Need a rush heat exchanger, re-tube, or shell replacement, come to Kennedy Tank!**
  - During the month of May the team took part in several rush heat exchanger jobs in which we were able to exceed our customer's expectations. In one instance, we received a call about the need for an expedited heat exchanger and were able to quote, engineer, fabricate, and deliver a new unit within 3.5 weeks which resulted in enormous savings for the customer!
- **Available Capacity in the shop!**
  - We do have room in our production schedule for both large and small projects! Our largest project of the year recently shipped which has opened up some capacity in our shop. Let us know what we can do to help you with your next heat exchanger, pressure vessel, or tank project!
