

## August's Edition of Kennedy Tank Talk

Team,

Thank you for reading the August's version of Kennedy Tank Talk. Read below for updates from the Kennedy Tank team.

### Reactors and all heating jackets welcome

2019 has been the year of the dimple and conventional jacket for Kennedy Tank. We have also seen an uptick in reactors with half pipe jackets and inner coils. Our shop has extensive experience with nearly all exotic alloys.

Jacketed Pressure Vessels

## 363 days without a recordable injury

As of writing this newsletter, our shop of 60+ ASME welders has gone nearly a calendar year without a recordable injury. We want to thank every teammate for taking a pro-active safety-first approach in their work and everyday life.

Safety

### Kennedy Tanks Annual Golf Outing

Congratulations to Robby Owens, Aaron Neldon, Scott Munns, and Patrick Kennedy for winning the annual Kennedy Tank golf outing. We had nearly 50 teammates play in the outing this year with some pictured to the right. We also want to thank Brian Lundsford, our expert API 650 engineer for organizing the event.

### See the team in person!

Our actions will always speak louder than our words. If you have a vessel, tank, or heat exchanger project and want to come audit/meet with our team, please reach out. On the right, Jake Gerlock is seal welding the tube to tube sheet joints on a shell and tube heat exchanger.

Please reach out if there are any vessel or tank projects we can help out with!
