

**September's Edition of Kennedy Tank Talk**

Team,

Thank you for reading September's version of Kennedy Tank Talk. Read below for updates from the Kennedy Tank team.

**Kennedy Tank launches new in house app!**

Six months ago we launched an in house developed APP that is focused on collecting real-time information on how the fabrication of a tank, vessel or heat exchanger is progressing. The APP allows us to capture contextual information throughout the course of each job and use that information to help us more effectively estimate, engineer and fabricate future jobs.

### **Tig Welded Distillation Column**

This column was 27" ID X 44' tangent length made of alloy 20 and completely tig welded. Big shout out to **Shane Peeler**, **Dawson Conley**, and **Rick Thomas** for the quality welds and craftsmanship on this project. We finished on budget and ahead of schedule!

Please reach out if there are any vessel or tank projects we can help out with!

Sincerely,
