

## July's Edition of Kennedy Tank Talk

Thank you for reading this month's version of Kennedy Tank Talk. See below for updates from the Kennedy Tank Team.

### Heavy Wall Pressure Vessels!

The Kennedy Tank team has drastically increased our efficiency and capabilities when fabricating vessels from 1-3" thick. Below you will see our largest bay full of vessels ranging from 3/4-2" thick. We have continually upped our crane capacity in Bay 5 which has allowed us to safely and efficiently build vessels up to 190,000 pounds. We currently are starting to fabricate our thickest stainless vessel in recent memory which clocks in at 2.5" thick!

### Welcome to the Team!

We have recently added (3) welders to our production team and want to

welcome **Anthony Lime, Ryan Noel, and Miles Turner**. We have paired each up with a mentor and they are already working with a foreman to learn the craftsmanship expected when working at Kennedy Tank.

They will soon team up with **Eli Johnson** of our quality control department for 1on1 rigorous training which we call "The School of Eli". Some of the training topics include welding positions, fit up of material, and choosing the correct wire and gas that matches the applicable welding procedures. Additionally, each welder is evaluated on bevel preparation, MIG roots and flux core fill, cover passes and weld sizes.

### Employee Spotlight: Jason Shaw

There might not be a more experienced project manager when it comes to field erected tank than **Jason Shaw**.

Jason joined Kennedy Tank when he was 22 years old and is now celebrating his 30th year of service at Kennedy Tank. Jason started as a boilermaker and has logged over 65,000 hours in the field before taking over as a project manager in 2006. Jason has erected tanks up to 150' diameter and is an expert at API 650 and AWWA field erected tanks.

**We have teammates ready to build your next field erected tank project**

**Kennedy Tank has been deemed an essential business and remains open and in production. We are continuing to practice proper hygiene and social distance while most of our office staff works from home.**

**Please let us know if we can quote your next vessel, heat exchanger, or tank, or field erected tank project!**

Sincerely,

**Jim Kennedy: [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523**
