

## The August Edition of Kennedy Tank Talk

Thank you for reading this month's version of Kennedy Tank Talk. See below for updates from the Kennedy Tank Team.

### Jack Harvey Finishes Ninth in the Indy 500!

**Jack Harvey** had his best finish in the 104th running of the Indy 500 on Sunday with a ninth-place finish all the while sporting a custom helmet with a photo of **Pat Kennedy** on the top. Jack viewed dad as a mentor of his which blossomed into a true partnership between the two.

Jack continues to visit Kennedy Tank monthly and is an adopted family member to the Kennedy family. Congrats and well done Jack!

### 35,000 Gallon Stainless Steel Pressure Vessel

In August the Kennedy Tank team fabricated and delivered this stainless vessel that was 11'-6" OD X 43' tangent to tangent length made of 316L stainless steel material. This vessel weighed 36,380 pounds and mainly comprised of 3/8" thick plate. This vessel also included multiple platforms and ladders, spot x-ray, and (19) nozzles. Heck of a job by the entire team and special shout out to Ryan Wheeler for his 3D engineered drawings and project management skills on this project!

## Welcome to the Kennedy Tank Team!

**Kara Seedbacher** and **Jim Saylor**, both joined the Kennedy Tank Team this month.

**Kara** is from Harmony, Pennsylvania, and attended Slippery Rock University, where she played soccer and earned a bachelor's in Safety Management. She worked as a laborer in college and has predominately worked in the underground tunneling industry practicing safety management.

**Jim** brings a ton of experience to the table. Jim is from Bloomington, IN and worked in the national guard for nearly 22 years. Jim has worked in maintenance in the chemical, heavy industrial, and mechanical industries for more than 30 years and has already brought a pro-active approach to maintenance.

### Employee Spotlight: Ricky Brown

The end of September will mark the end of an era for a Kennedy Tank hall of famer. **Ricky Brown** started at Kennedy in August of 1991 and has run our burn table ever since. He has operated (3) different burn tables throughout his time at Kennedy Tank and is known for his work ethic, commitment to being a team player, and being one of the most liked people in the company. We will miss Ricky dearly and thank him for his 29 years of service! Well done!

The Kennedy Tank Team has been field erecting tanks since the early 1970's! Below is a 50' diameter tank we built in 1972. Put our 50 years of field erecting tank experience to work on your next field erected project!

**Kennedy Tank has been deemed an essential business and remains open and in production. We are continuing to practice proper hygiene and social distance while most of our office staff works from home.**

**Please let us know if we can quote your next vessel, heat exchanger, or tank, or field erected tank project!**

Sincerely,

**Jim Kennedy: [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523**
