

December's Edition of Kennedy Tank Talk

Team,

Thank you for reading December's edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

Lumin-Air Air Cleaning Installed!

Last week the team from [Lumin-Air](#) installed (4) ultraviolet germicidal irradiation (UVGI) in our facility. These UV cleaning systems reduce, and even eliminate, harmful pathogens and are efficient in reducing unwanted surface and airborne microbes. Thank you to Andrew Desmarais and Dan Fillenwarth for partnering with us in this effort!

Recently shipped stainless ASME pressure vessels!

The Kennedy Tank team recently rose to the challenge and fabricated (3) storage vessels that were 10' OD X 25'-4" tangent height with dished heads on support legs and made of 304 stainless steel. This was the second project in which we have worked with this chemical plant in Michigan and the team delivered with supreme quality while also meeting a critical delivery date.

Experts in Heat Transfer!

We recently fabricated (2) vessels with dimple jackets and have vessels with both half-pipe and conventional jackets plus internal coils currently going through fabrication. We have been building jacketed vessels for well over 70 years and would love to quote your next dimple, conventional, or half-pipe project!

Added Shop Capacity!

This month we added (2) 5-ton cranes to our 50' X 50' building which enables us to build smaller pressure vessels and heat exchangers in a building that can be segregated from other alloys. Special thanks to Bohl Crane for working with us on this project!

As a proud member of TEMA, we are capable of building shell and tube exchangers from 100-4,000+ tubes. Let us know put our industry-leading engineering and fabricating experience to work for you on your next heat exchanger project!

Kennedy Tank has been deemed an essential business and remains open and in production. We are continuing to practice proper hygiene and social distance while most of our office staff works from home.

Please let us know if we can quote your next vessel, heat exchanger, or tank, or field erected tank project!

Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523
