

February's Edition of Kennedy Tank Talk

Team,

Thank you for reading February's edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

Pat Kennedy commemorated in the 2021 Mini-Marathon

The entire Kennedy family and team want to thank Bob Bryant for commemorating the late Pat Kennedy in this year's mini-marathon. It has become a tradition to place a hidden message somewhere in the participant shirt and we all feel honored that our dad was chosen to be honored this year. Dad's initials and car number will be on each shirt and he will also be showcased on each medal given to all participants.

Here to tackle your next complex pressure vessel

This week we successfully hydro tested this stainless vessel which was 144" ID X 18'-3" tangent length with (4) internal baffles, (3) zones of the half-pipe, and (26) unique nozzles.

Tim Noyes, Stephen Prout, John Wehr, Rex Clark, Patrick Kennedy, Marco Diaz, Joel Delgadillo, and Danny Carmin led the charge and executed beautifully on this project. The halfpipe alone had over 1,500 feet of weld!

Well done team!

Helium Leak Tests

In February we had (9) shell and tube heat exchangers successfully pass a helium leak test on the tube to tube sheet joint of each unit.

Helium leak detection is a highly effective and quick method of locating sources of air leakage in the most important joint for all heat exchangers. To the left, you will see a partner from Loy Instruments performing this test on a 40' long heat exchanger.

Employee Spotlight: Dave Shadiow and JD Smith!

We all want to congratulate **Dave Shadiow** and **JD Smith** on their 36th and 33rd anniversary of working at Kennedy Tank. Dave is the lead engineer in our heat exchanger department and regularly tackles complex heat exchanger projects and JD is our heat exchanger engineering manager and is one of the best thermal engineers in the country. Congrats men!

The Kennedy Tank field division is currently erecting tanks in Ohio and Michigan and is available to help you with your next field-erected tank project. From small tanks in tough locations to 80'+ diameter field erected tanks, we are the go-to source for field erected tank projects in the Midwest!

Please let us know if we can quote your next pressure vessel, heat exchanger, tank, or field erected tank project!

Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523

Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526

Jim Dossman: Jdossman@kennedytank.com, 317-780-3554

Paul Bolin: Pbolin@kennedytank.com, 317-780-3528
