

## The April Edition of Kennedy Tank Talk

Team,

Thank you for reading the April edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

### Kennedy Tank Team rises to the challenge on high profile expedited delivery heat exchanger

We want to give a big shout-out to the team for fabricating this high-quality BEW 35-132 TEMA unit with (1,614) copper tubes. **Derick Muse, Justin Ard, and John Belskus** led the charge in fabricating this unit and **Brian Rhodes** oversaw all engineering.

Our customer had the following to say about our performance: "The entire Kennedy team did an awesome job!!!!!! The delivery schedule was very aggressive because we needed the exchanger for an outage that started today. Jim was in constant contact and was always reassuring me that Kennedy was going to meet the deadline, and they did! Thanks to all that were involved in making this happen, great job".

## 90 years of ASME Pressure Vessel Experience

Let us put our 90 years of ASME experience to work on your next project! Below is a column we built back in 1996 that shipped to a customer we still fabricate vessels for today!

### New In-house PMI Gun

Earlier this month, we decided to purchase a Sci-Aps X-505 PMI gun which is a lightweight handheld X-ray tube analyzer. This allows our quality control department to identify alloy steels and welds within seconds.

Thanks to **John Cochran** and **Rich Norris** for leading the research and development on this project.

Let us know if we can put this new equipment to work on your next shell and tube exchanger, tank, or pressure vessel project!

## Welcome Jackie Brown!

The Kennedy Tank team wants to welcome **Jackie Brown** who recently joined us as a safety intern. Jackie is a recent graduate of Indiana State where he graduated in safety management.

Jackie brings a passion for teamwork and has already risen to the challenge on several projects for our shop and field division. Welcome to Kennedy Tank Jackie!

## Bill Kennedy Announced as STI/STPA President

Earlier this month, **Bill Kennedy** was announced as the President of the Steel Tank Institute/ Steel Plate Fabricators Association.

Bill joins his grandfather William E Kennedy Jr who served as STI President in 1963. Bill had previously held the role of treasurer for this organization.

Bill has served several roles at Kennedy Tank including purchasing manager, Vice President of Manufacturing, and now President of Kennedy Tank, Southern Tank, and Steel Tank and Fabricating Corp.

Congrats on this well-deserved honor Bill!

The Kennedy Tank field division remains available and ready to tackle your next field-erected tank project! Our tank crews are currently working on projects in Ohio and Michigan but we do have capacity and personnel available to jump on your next field-erected tank project!

Sincerely,

**Jim Kennedy: [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523**

**Tim Noyes: [Tnoyes@kennedytank.com](mailto:Tnoyes@kennedytank.com), 317-780-3526**

**Jim Dossman: [Jdossman@kennedytank.com](mailto:Jdossman@kennedytank.com), 317-780-3554**

**Paul Bolin: [Pbolin@kennedytank.com](mailto:Pbolin@kennedytank.com), 317-780-3528**
