

## The June Edition of Kennedy Tank Talk

Team,

Thank you for reading the June edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

### Kennedy Tank Team rises to the challenge on a SS API 650 Tank

The team recently completed a hydro test for this 30,000 gallon 304 SS API 650 tank which was spot x-ray with intricate internals and over (15) 150# RFSSO flanges. We also fabricated a caged ladder, platform, and perimeter handrail. This tank is 13' diameter and weighs over 35,000 pounds. Our customer was very impressed with the quality of this tank and thought our cleaning system left the tank with a very high quality finish.

### KTM Tank built-in 1965 was still in service!

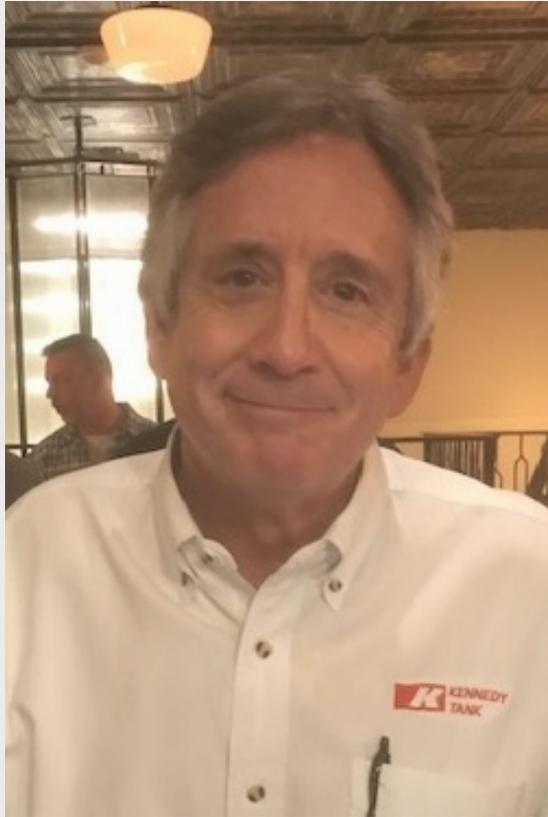

Dave Reinkemeyer received a call last week from one of our customers who is demoing an old Kennedy Tank hot water tank at a local

Indianapolis area high school.

This tank was built by the Kennedy Tank Team in 1965 and had a great 56-year run and was still in good working service before the demo began.

What a great depiction of Kennedy Tank. We do not cut corners when it comes to designing and fabricating high-quality tanks and vessels!

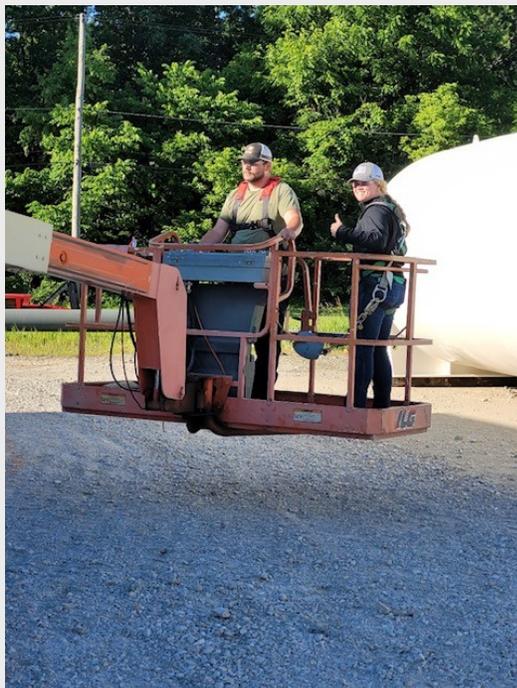

### Teammate Spotlight: Paul Bolin!

In this month's teammate spotlight, we honor a Kennedy Tank Hall of Famer, Vice President of Sales, **Paul Bolin**. Paul has been the VP of Sales for 25 years and is known in the industry as being one of the great field-erected tank sales engineers in the country.

Paul is always willing to stretch our capabilities in order to meet our customer's needs and is beloved by all of his long-time customers and Kennedy Tank teammates. We all benefit from his positive and can-do attitude.

We are all thankful to work with Paul!

### June Safety Training

A big shout out to our safety director **Kara Seebacher** and **Jackie Brown** who have doubled down on organizing and leading safety training for all of production teammates on a weekly basis. To the right Kara and lead quality control Inspector, **Eli Johnson** are undergoing JLG training to ensure all Kennedy Tank teammates are certified and knowledgeable in using all of our ever-growing equipment. Well done!

The Kennedy Tank field division remains available and ready to tackle your next field-erected tank project! In the photo below, Roger Devoy is running the three o'clock sub-arc on the third circumferential seam for a large diameter field-erected tank in the midwest.

Sincerely,

**Jim Kennedy:** [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523

**Tim Noyes:** [Tnoyes@kennedytank.com](mailto:Tnoyes@kennedytank.com), 317-780-3526

**Jim Dossman:** [Jdossman@kennedytank.com](mailto:Jdossman@kennedytank.com), 317-780-3554

**Paul Bolin:** [Pbolin@kennedytank.com](mailto:Pbolin@kennedytank.com), 317-780-3528
