

## The July Edition of Kennedy Tank Talk

Team,

Thank you for reading the July edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

### The team successfully fabricated this custom and large pressure vessel!

The team recently completed shipment on this 35,000-gallon pressure vessel. This vessel was 11' ID X 45' tangent length and weighed 42,000 pounds. Included in this vessel were over 20 nozzles, support saddles, and a 30' long platform and perimeter handrail. Well done by all involved!

### Welcome Doug Kirkman!

Kennedy Tank reached out to IUPUI to develop a summer internship opportunity that is advancing our digital solutions and providing good real-world experience. Over the last several weeks **Doug (pictured to the right)** has been helping with improvements to our current business intelligence reports and in-house developed apps. He has also been a huge help in creating new solutions focused on our safety initiatives and field operations. Thank you to **Dan Yoder (pictured to the left)** for leading this effort!

### Teammate Spotlight: Kent Hopkins!

For this month's Kennedy Tank spotlight we showcase foreman, **Kent Hopkins**. Kent is an 11 year Kennedy Tank veteran and is known for his preplanning, strategic vision, and a people-first approach to leading complex projects. Kent focuses on API 650, UL 142, and custom pressure vessel projects and will oversee thicknesses and gallonages ranging from 300 gallons to 60,000 and 3/16" thick to 3" thick.

Kent is also a foster parent and he and his wife have helped raise many children who needed a helping hand. We are thankful for Kent and thank him for his contribution to Kennedy Tank!

### STAFCO Golf Outing

Last Saturday, many teammates from Kennedy Tank drove up north to play in the Steel Tank and Fabricating Corp (STAFCO) golf outing. STAFCO is our sister company located in Columbia City, IN, and specializes in single and double wall UL 142 tank fabrication.

Congrats to Shane Peeler, Jon Wehr, Scott Munns, and Chris Buffkin for winning this year's event!

The Kennedy Tank field division remains available and ready to tackle your next field-erected tank project! We recently built this Water Tank at a cemetery in the great state of Kentucky. Please follow our company page on LinkedIn to view #fieldtankfriday which spotlights a field-erected tank project every Friday!

Sincerely,
