

## The August Edition of Kennedy Tank Talk

Team,

Thank you for reading the August edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

### Ladders and Platforms Galore!

Big shout out to the team who recently fabricated this complex carbon steel vessel and trial fit all (4) ladders and platforms in the vertical position which was a safer and more efficient option for the team. **Danny Carmin** and **Rex Clark** led the charge on this effort.

### Kennedy Tank Golf Outing

Earlier this month, we had our annual Kennedy Tank Golf outing in which 60 teammates participated this year.

It was quite the competition in the blistering heat but we would like to congratulate **Kevin Bolin**, **Jerry Logsdon**, **Ryan Wheeler**, and **AJ Lime** for winning this year's outing!

### Teammate Spotlight: Gabe Hamm!

**Gabe Hamm** recently celebrated his 17 year anniversary here at Kennedy Tank. **Gabe** started as a welder in the shop and has been with our estimating team for over 15 years. His current role is estimating manager where he is regarded as an expert at ASME pressure vessels, API 650 tanks, custom fabrication, and field-erected tanks. Gabe is known for keeping Kennedy Tank a fun place to work and always having a positive attitude. Thanks for all that you do Gabe!

### Safety Training

We have recently hired several new teammates on our production team and they have all participated in rigorous safety training including JLG training shown to the left in which **Kara Seebacher** (Safety & Environmental Manager) and **Jonathan Williams** cover the basics of operating one of our many JLG's.

### Capital Equipment Upgrade

**Jim Saylor** (facilities and maintenance manager) trains the team on a recently purchased new band saw which allow us to more efficiently cut pipe, angle, and other structural components.

### Ready to Partner on your Next Field Erected Tank Project!

In the photo below, two Kennedy Tank field-erected tank legends, Jason Shaw and Heath Knipp are inspecting all straight seams and circumferential seams on a stainless steel field-erected tank we built in Michigan. Heath is an API 653 inspector and plans several visits to each field-erected tank project to help ensure top quality is met every time we build a large diameter tank at a customer's site.

Sincerely,

**Jim Kennedy:** [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523  
**Tim Noyes:** [Tnoyes@kennedytank.com](mailto:Tnoyes@kennedytank.com), 317-780-3526  
**Jim Dossman:** [Jdossman@kennedytank.com](mailto:Jdossman@kennedytank.com), 317-780-3554  
**Paul Bolin:** [Pbolin@kennedytank.com](mailto:Pbolin@kennedytank.com), 317-780-3528
