

## The October Edition of Kennedy Tank Talk

Team,

Thank you for reading the October edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

### 60,000 Gallon Pressure Vessel

Earlier in October, the Kennedy Tank team finished fabricating an exciting project for (2) 60,000 and (2) 30,000 gallon 304 SS pressure vessels. Below is a photo of (1) 60,000-gallon vessel which was comprised of 3/8" thick plate and weighed 62,000 pounds with (5) support saddles. This project took a total team effort and congrats to all Kennedy Tank teammates who made this one a success!

### T-shirt fundraiser for Pink Ribbon Girls

The team has organized a fundraiser in honor of a phenomenal teammate of ours, **Kate Cleary**. Kate has been battling Breast Cancer and has undergone multiple surgeries, infusions, chemotherapy all the while raising wonderful children and working full time. Each shirt is 20 dollars and all proceeds will go to the Pink Ribbon Girls Organization.

Please reach out if you would like a shirt and thank you **Kate Cleary!**

### **Nutrition Lunch and Learn**

The wellness team would like to thank **Catherine Kirkhoff** of Apex Benefits for presenting the basics of nutrition and how food choices affect our mental health. It was a great turn out and we all learned a ton as we continue to strive to improve our health one day at a time here at Kennedy Tank.

### **Heat Exchanger Replacement and Repair!**

Today we shipped out a replacement shell and tube heat exchanger and a bundle we repaired for a chemical plant in the Louisville area. This customer came in to inspect the new unit and dropped off a bundle for our field division to repair.

We continue to strive to be the leading heat exchanger fabricator and maintenance resource in the Midwest!

## **Ready to Partner on your Next Field Erected Tank Project!**

In the project below, the Kennedy Tank team's scope included erecting, painting, insulating several API 650 tanks ranging from 18'-40' in diameter in the Midwest. We would love to be of service to you and your team on your next field-erected tank project!

Sincerely,
