

The January Edition of Kennedy Tank Talk

Team,

Thank you for reading the January edition of Kennedy Tank Talk. Please see below to learn about exciting projects and events happening at Kennedy Tank.

Churning out Large Diameter API 650 Tanks

The Kennedy Tank team is mid-fabrication on a large project consisting of several 30,000 gallon API 650 tanks and ASME pressure vessels in which many are 14' diameter like the one shown below and painted, KENNEDY TANK RED!

Welcome David Duke!

We would like to welcome **David Duke** to the Kennedy Tank Team.

David joins as a quality control inspector for our field division and brings a bevy of experience as an expert fabricator and welder.

He has already made a big impact here at Kennedy Tank and we are lucky to have him on our team.

2021-2022 Recordable Streak

We would like to give a huge shout-out to the Kennedy manufacturing team for going 457 days without a recordable injury which is the longest streak in the history of our company!

This streak is the result of an unbelievable focus and proactive approach that puts safety at the forefront of everything we do here at Kennedy Tank.

Committed to Industry Leading Quality

Outside of safety, Kennedy Tank takes quality as the bedrock of our foundation. Whether it's our 60+ ASME welders, our (5) quality control inspectors, our foreman, engineers, or salesman, we go the extra mile every step of the fabrication process to ensure we are the industry leader in fabricating high-quality vessels and tanks.

Experts in Shell and Tube Exchangers

Kennedy Tank is the Midwest leader in repairing or replacing shell and tube exchangers. On the project below, our manufacturing shop built a new tube bundle which was installed by your field division and shipped to one of the largest petrochemical plants in the country. The team had also replaced the shell on this unit the year prior and received excellent feedback from our customer. Well done team!

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!
Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523
Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526
Jim Dossman: Jdossman@kennedytank.com, 317-780-3554
Paul Bolin: Pbolin@kennedytank.com, 317-780-3528
