

## The March Edition of Kennedy Tank Talk

Team,

Thank you for reading the March edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

### Featured Project of the Month

The Kennedy Tank team recently shipped (8) 10,000-gallon barge vacuum tanks to a large refinery in the south. These vessels were 5/8" thick, had an internal steam coil, post-weld heat-treat, included (2) unique 36" RFWN manways, and were internally lined and painted externally.

#### Dennis Collins 31 year anniversary!

We would like to celebrate and honor **Dennis Collins** on his 31st anniversary here at Kennedy Tank.

Dennis is a project engineer and is the coordinator between engineering and the shop for layout, CNC programming, and much more.

Thank you Dennis!

#### Focus on Training

We have recently hired several new production teammates who have all taken part in our welding training called the "School of Eli" in which **Eli Johnson** walks them through the fundamentals of welding.

Eli is paramount in ensuring all teammates know the Kennedy Tank quality standard that our customers and teammates have come to expect.

## Large Tanks in Fabrication

Kennedy Tank veteran **Gary Martin** is rolling a 1/2" thick, 118" wide X 450" long plate for a 50,000-gallon tank we are getting started on in our manufacturing facility.

Our new Davi plate roll has been an absolute game-changer allowing us to roll thicker and wider material and also help increase our manufacturing efficiency.

## Loaded Energy Safety Presentation

Last week during our weekly production meeting, safety director, **Kara Seebacher** spoke in detail about loaded energy and how the team can be cognizant while doing their everyday activities in our manufacturing facility.

Our proactive, communicative safety culture has allowed us to continue to lead the tank and vessel industry!

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!

Sincerely,

**Jim Kennedy:** [Jkennedy@kennedytank.com](mailto:Jkennedy@kennedytank.com), 317-780-3523
