

## The April Edition of Kennedy Tank Talk

Team,

Thank you for reading the April edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

### 2021 Steel Tank Institute Pressure Vessel of the Year!

We are honored to have received the [STI/SPFA](#) 2021 shop fabricated pressure vessel of the year award earlier this month in New Orleans.

This vessel was mostly comprised of 3/8" thick steel and had a unique 1/2" thick intermediate flat bottom consisting of 4 heavy-duty I-beams welded for additional support. This vessel had a total of (29) nozzles with (5) manways and weighed 61,000 pounds including (6) platforms that were located at each manway and near the top of the vessel. The vessel was lined with Chemline 784 and had one stainless steel tray bolted halfway up the shell which was installed by the Kennedy Tank team.

#### Welcome Safety Intern

We all would like to welcome **Blake Monroe** to the Kennedy Tank team as our safety summer intern. Blake started on Monday and has begun learning more about our safety culture and helping across both manufacturing and regional field services for he has already visited several job sites. Welcome to the team Blake!

#### Safety Award of Excellence!

We would like to give a big shout-out to all of our teammates at Kennedy Tank, Southern Tank, and [Steel Tank and Fabricating Corp.](#) for receiving the 2021 Safety Award of Excellence at the [STI/SPFA](#) annual meeting earlier this month.

The safety award of excellence Recognizes member companies whose employees have experienced a ZERO (0.00) OSHA Total Recordable Incident Rate for the previous calendar year.

#### Experts in Field Erected Tanks

The Kennedy Tank Team is currently erecting field tanks in Ohio and Indiana

and is capable of traveling up to 700 miles for field-erected tank projects. Please reach out to us if we can assist you with your next API 650 field-erected tank.

## Capacity up to 60,000 Gallons!

There are not many ASME and tank fabricators capable of building API 650, UL 142 tanks, and ASME vessels up to 60,000 gallons with ease in their manufacturing facility. The tank below was a 40,000-gallon API 650 tank that shipped to the great state of Wisconsin.

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!

Sincerely,
