

## The June Edition of Kennedy Tank Talk

Team,

Thank you for reading the June edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

### God Bless May in Indianapolis!

The Kennedy Tank team had a great month of May here in Indianapolis. We spent Fast Friday at the track with some of our best customers and also were able to take the Kennedy Tank Special out of our lobby to get it ready to run at the Indianapolis Motor Speedway in the near future.

The Kennedy Tank Special, driven by George Barringer with riding mechanic Dick Wilkes, finished in 8th position in the 1936 Indianapolis 500.

### Field Division Building Remodel

We have completed the remodel of our field division that added a state-of-the-art conference room and several offices for future expansion. Thanks to the team for working together and staying patient as all of this was accomplished over the past several months.

### Safety Award of Excellence!

We would like to give a big shout-out to all of our teammates at Kennedy Tank, Southern Tank, and [Steel Tank and Fabricating Corp.](#) for receiving the 2021 Safety Award of Excellence at the [STI/SPFA](#) annual meeting earlier this month.

The safety award of excellence Recognizes member companies whose employees have experienced a ZERO (0.00) OSHA Total Recordable Incident Rate for the previous calendar year.

### Emergency Heat Exchanger Repair

We received a call from a great customer on Thursday night of last week stating they were in desperate need of an emergency heat exchanger repair for a start-up occurring today.

We immediately shipped the shell and tube exchanger to our facility and repaired the unit and had it back to them by 9 am the following Monday.

## TEMA Shell and Tube Heat Exchangers

The team recently fabricated (6) stacked BEM 13-144 ammonia still lean shell and tube heat exchangers for a chemical plant in Illinois. This photo was taken before hydro to ensure proper fit-up while stacking these units. Well done team!

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!

Sincerely,
