

The July Edition of Kennedy Tank Talk

Team,

Thank you for reading the July edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

BES 26-192 Shell and Tube Heat Exchanger

The Kennedy Tank team recently finished fabrication on this BES 26-192 with (250) 1" OD tubes made of SA-214. This unit weighed 12,500 pounds and 600# flanges and forgings plus 1.25" thick bonnets. This is delivering to a new customer in Georgia who is very pleased with the Kennedy Tank Team.

Welding School Comes to Kennedy Tank

We would like to thank the President of a local welding school who spent time touring our facility and visiting with our younger production teammates about the importance of the trades and the benefits of a career in welding. We strongly agree with him!

Preparation is Key

Below is a photo we took during a pre-planning meeting for a large surface condenser we are building for a repeat customer.

We strongly believe in the value of these meetings to ensure all departments and key personnel are on the same page to help us perform to the best of our ability on all projects.

Additional Capacity!

We recently added cranes to our 50' X 50' building which allowed us to build (2) of these custom stainless steel pressure vessels.

This new capacity will help us build higher alloy vessels in a controlled environment.

Field Erected Tank Availability

We hope you all had a great fourth of July and want to let you know that we have crews available and ready to tackle your next field erected API 650 tanks ranging from 10-150' diameter and an array of alloys.

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!

Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523

Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526

Jim Dossman: Jdossman@kennedytank.com, 317-780-3554

Paul Bolin: Pbolin@kennedytank.com, 317-780-3528
