

The November Edition of Kennedy Tank Talk

Team,

Thank you for reading the November edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

2022 Field Safety Day

Thank you to all of our field teammates who came together on Monday for our annual field safety day. This is a day of learning and reinforcing that safety is our absolute priority here at Kennedy Tank.

We had several guest speakers and were also able to discuss best practices with many of the best field boilermakers in the country.

We had teammates come in from Indiana, Michigan, and Ohio, and special thanks to our safety leader and queen, **Kara Seebacher** for organizing this impactful day.

Lastly, thank you to all of our customers who allowed our teammates to come to this event and miss a day working at their plants.

Dimple Jacketed Vessels

Last week we shipped out (2) 5,800-gallon stainless steel dimple jacketed pressure vessels.

We have been on a run of dimple-jacketed tanks and vessels in our shop that has consisted of over (14) tanks and vessels in the past three months.

Each of these vessels had over 3,000 dimples and we have welded in the ballpark of 50,000 dimples in the past three months.

Well done by the Kennedy Tank team!

Former NFL Player Speaks to our Field Team

We would like to thank former Colts player, **Joe Reitz** for speaking to our field division about the importance of faith, hard work, fighting through adversity, and laying it all on the line every day.

Thanks for speaking to us all Joe!

United Way Charity Program!

In November, we raised money for the United Way by participating in a Chili cook which is always one of our favorite lunches of the year.

Congrats to all of the winners and thanks to everyone who brought in a bowl of Chili.

We also had a company-wide corn hole tournament earlier in the month to raise money for this important initiative.

Thank you to **Bridget Saylor** for organizing this annual tradition.

Your go to source for tank repair projects!

The Kennedy Tank team has laid down sand and is starting to lay out steel for a bottom replacement on a 70' diameter field erected API 650 tank in the great state of Illinois.

We would love the opportunity to work with your team on any field-erected tank repair or replacement projects located within 400 miles of Indianapolis, Indiana.

Please reach out if we can be of assistance on your next tank, vessel, heat exchanger, field-erected tank, or repair project!

Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523

Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526

Jim Dossman: Jdossman@kennedytank.com, 317-780-3554

Paul Bolin: Pbolin@kennedytank.com, 317-780-3528
