

## The September Edition of Kennedy Tank Talk

Team,

Thank you for reading the September edition of Kennedy Tank Talk. Please see below to learn about exciting updates from the Kennedy Tank Team.

### 80,000 Pound Bullet Vessel

Kudos to the entire team who engineered, fabricated, tested, and painted this 80,000-pound bullet vessel for the second time this year.

This vessel was 9' OD X 63' tangent length and rated for 270 PSIG with a 1/8" corrosion allowance and included PWHT, full x-ray, insulation rings, nozzles, platform support clips, steam heater supports, third-party fireproofing of saddles, and much more.

## Several Interesting Projects in Fabrication

This shell and tube heat exchanger was a TEMA Model- E-34-240 with 2205 duplex tubes that were expanded on the tube to tube sheet joint and also featured an expansion joint on the shell.

This heavy wall carbon steel pressure vessel went to a refinery in Ohio. The team met an expedited schedule to deliver this vessel before a plant shut down.

## Welcome New Field Quality Control Manager

We want to welcome **Rick Smetana** as our new quality control manager for field services.

Most Recently Rick worked with OneCIS/Bureau Veritas Inspection & Insurance Company for fourteen years before moving his career back to Kennedy Tank.

## KTM Band Playing Friday in Indy

**Johnny Logan and the Roughnecks** which is comprised of five Kennedy Tank teammates will be headlining at Duke's on Friday, September 29th at 8 pm.

We look forward to seeing them pack the house for their first show headlining in Indy.

Duke's Indy is located at 2352 S West St., Indianapolis, IN 46225

**JOHNNY LOGAN & THE ROUGHNECKS**  
With Zach Pietrini

Tickets \$12 @ [www.dukesindy.com](http://www.dukesindy.com) or \$15 @ the door

Friday, September 29th, 2023  
@ 8:00 PM  
Duke's Indy  
2352 South West Street,  
Indianapolis, IN, 46225

Doors open @ 6:00 PM  
Music starts @ 8:00 PM

## KTM Attends Fall Steel Tank Institute Meeting

Several Kennedy Tank Teammates attended the fall [STI/SPEA](#) fall meeting in Orlando, Florida two weeks ago.

This was a great opportunity to learn from peers and also discuss best practices with some of the best tank and vessel fabricators in the country.

## Leaders in Field Process Piping

Below was an example of a comprehensive condensate piping and pumping project in Illinois which started with the construction of two 120,000-gallon SS field tanks.

Currently, our union pipefitters are working with design engineers, electricians, insulators, and plant operators to upgrade the boiler feedwater system at this power plant.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, and much more.

Sincerely,
