

The February Edition of Kennedy Tank Talk

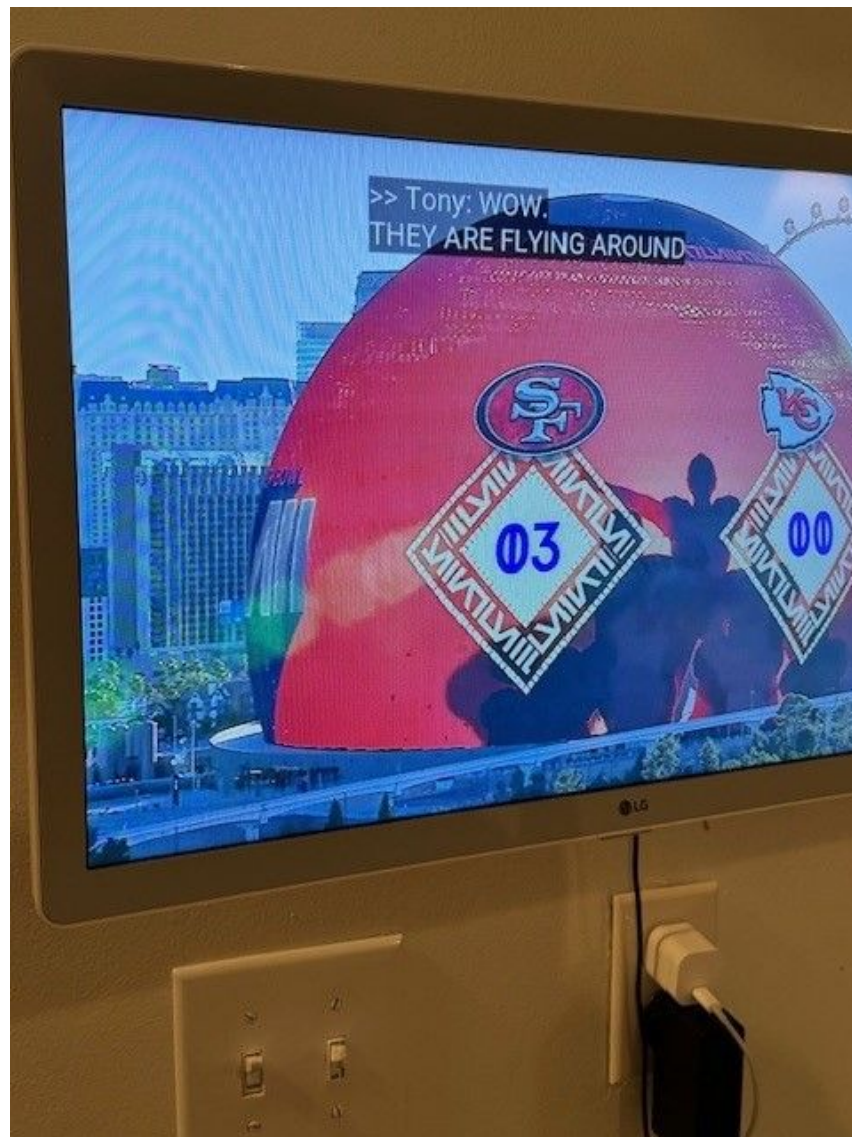

Team,

Thank you for reading the February edition of Kennedy Tank Talk. We hope you are all having a good start to this exciting year.

Kennedy Tank Air Receivers Showcased on Super Bowl Sunday

If you look closely at the bottom left of the TV screen, you will see (3) 22,500-gallon air receivers that Kennedy Tank built to store compressed air for the Las Vegas Sphere.

This was showcased in the second quarter of the Super Bowl and we have learned that over 200 million people had the opportunity to see the high-quality vessels that the Kennedy Tank team recently built.

Updates from Kennedy Tank

Please help us congratulate Jacob Gerlach on his promotion to Assistant Project Coordinator at the beginning of February.

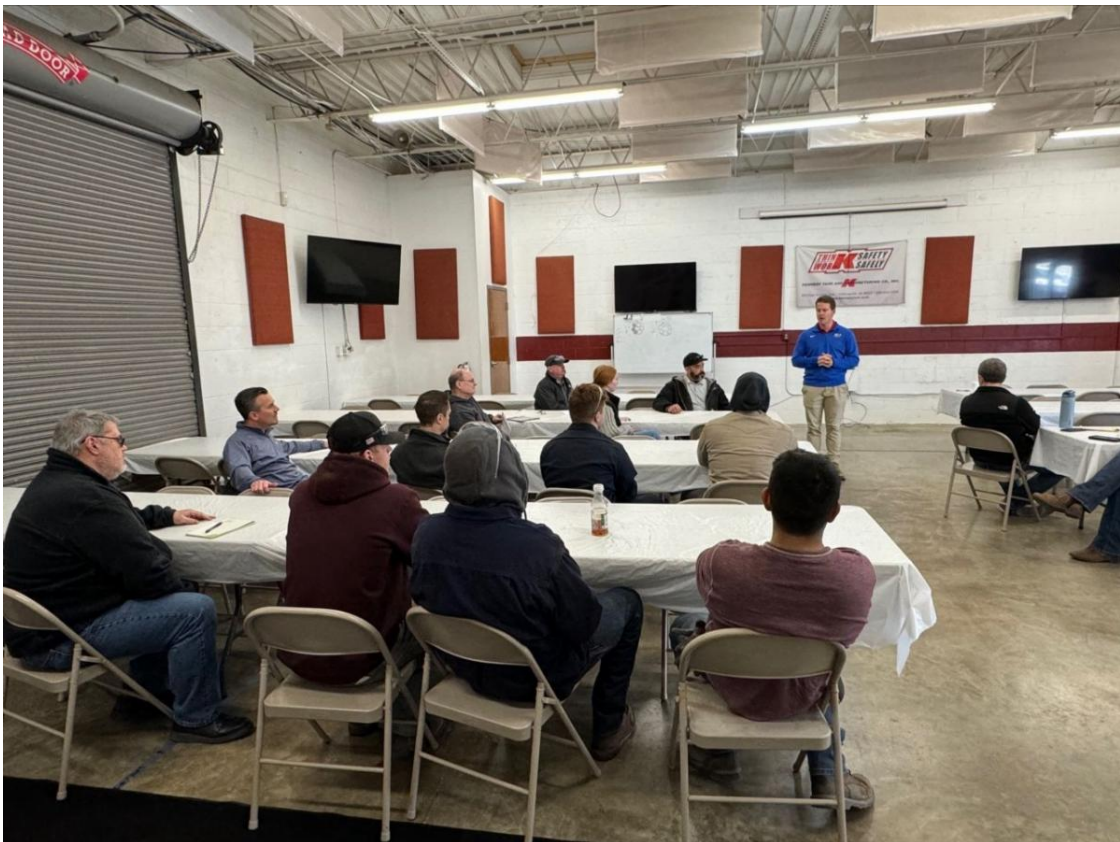

Jake was hired as a welder in the main shop in 2022 and excelled in his welding career with tanks and vessels and also shell and tube heat exchangers.

We are thrilled to welcome **Holly Williams** to the Kennedy Tank team as a mechanical engineer.

Holly recently graduated from IUPUI's School of Engineering and enjoys reading and spending time with her family. She has already hit the ground running!

Meet the Managers Meeting

We had an effective meet-the-managers meeting on Thursday of last week to introduce our new teammates in welding, project engineering, and layout engineering to our management team.

It is fun to see the excitement of new teammates and also the wisdom of our older teammates who have navigated successful careers here at Kennedy Tank.

State-Of-The-Art Trailers

Special shout out to Vince Easler, our Field Division Operations Manager, who recently completed an overhaul renovation of our 6th mobile tool room and break space for our field-erected tank crews and plant maintenance crews.

Heavy Wall Pressure Vessel

Our team successfully fabricated and shipped this heavy wall pressure vessel that was 72" ID X 30'-0" tangent length with a 2.5" thick intermediate head and full x-ray, PWHT, mag particle testing, and much more.

We were able to ship this to our customer one week before the promised delivery date which will allow them to get it up and running during their upcoming outage.

Well done by all involved!

Experts In Building Field Erected Tanks

Last week, the Kennedy Tank team visited one of our best field customers in Illinois and was reminded of the high quality in which we erected these (2) 125,000-gallon API 650 tanks which included turn key solution for our customer.

Please keep us in mind for your next field erected API 650 tank project.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, plant maintenance, and much more.

Sincerely,

Jim Kennedy: Jkennedy@kennedytank.com, 317-780-3523

Tim Noyes: Tnoyes@kennedytank.com, 317-780-3526
