The June Edition of Kennedy Tank Talk

Team,

Thank you for reading the June edition of Kennedy Tank Talk. Read below for updates from the Kennedy Tank Team.

12,000 square feet of added capacity!

The ribbon-cutting ceremony will take place this week to introduce our new 12,000-square-foot building!

This expansion will enhance our safety program and initiatives and also allow us to build nearly 30% more 12-15' diameter vessels and tanks on our 25 acre campus. Thanks too all current and past teammates who made this expansion possible!

Updates from Kennedy Tank

The team is currently working on completing this knockout condenser for a new customer in the Midwest.

This is a BEM 29-180 and will be successfully hydrotested this week.

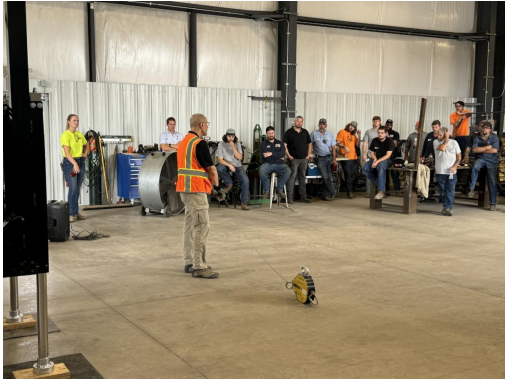

We continue to see massive increases year over year in the number of 12-15' diameter tanks and vessels we fabricate annually. This API 650 tank is 14'-0" OD and going to North Dakota.

Experts in Field Erected API 650 Tanks

The Kennedy Tank team only has a few more days left at a battery recycling plant in which we erected several field erected API 650 tanks in both carbon and stainless steel.

Monthly Safety Training

We want to thank Guardian for presenting the importance of fall protection to our team and giving great examples of best practices used in the field to help educate all Kennedy Tank teammates.

As we all know, the right fall protection system dramatically reduces the likelihood of falls, whether from ladders, scaffolding, roofs, or unprotected edges.

Thank you to Melanie Komaskinski and Megan Cross for organizing this impactful training.

Kennedy Tank Walking Challenge

Congrats to all Kennedy Tank teammates who participated in this year's six-week walking challenge. The team walked over 5,500 miles as a Kennedy Tank Team, a record! The winners are team 6: Isaac Riley, Dan Yoder, Jerry Logsdon, and Raymond Mackenzie.

Please reach out to any of your Kennedy Tank representatives if we can be of assistance on pressure vessels, tanks, heat exchangers, field-erected tanks, plant maintenance, and much more.

Sincerely,
The Kennedy Tank Team
